Dr. Arun Kumar

IQAC Coordinator, A N College Patna

What is Coursera?

Coursera is a world-wide online learning platform founded in 2012 by Stanford computer science professors Andrew Ng and Daphne Koller that offers massive open online courses (MOOC), specializations, degrees, professional and master track courses. One can join Coursera for free and learn online and build skills with courses from top universities like Yale, Michigan, Stanford, and leading companies like Google and IBM. Coursera works with universities and other organizations to offer online courses, certifications, and degrees in a variety of subjects, such as engineering, data science, machine learning, mathematics, business, computer science, digital marketing, humanities, medicine, biology, social sciences, and others. Product and Services:

Coursera courses last approximately four to twelve weeks, with one to two hours of video lectures a week. These courses provide quizzes, weekly exercises, peer graded assignments, an optional Honors assignment and sometimes a final project or exam. Courses are also provided on-demand, in which case users can take their time in completing the course with all of the material available at once. As of May 2015 Coursera offered 104 on-demand courses it also provides guided projects which are short 2-3 hour projects that can be done and it is very useful for college going students. The coronavirus (COVID-19) outbreak continues to spread around the world, compelling many universities in impacted regions to discourage students from coming to campus while suspending face-to-face seminars. As a global learning platform and community of the best universities in the world, Coursera offers assistance to the educators staring at the prospect of closing their campuses and searching for ways to mitigate the impact on their students. This initiative helps Coursera to deliver its mission and promise to help learners everywhere get access to the world's best education, particularly in the face of a global crisis.

Coursera for Campus: It is an Online Learning Platform for Universities An institute can transform the campus with high-quality, job-relevant online courses from leading universities and companies. Deliver world-class learning to the students.

Coursera Campus Response Initiative is available at no cost to any global university impacted by COVID-19.

It contains:

1. Access to 3,800 courses, 400 Specializations, 270 Guided Projects.

2. Up to 5,000 licenses for enrolled students at impacted organization.

3. Institutions may enroll students through September 30, 2020.

4. Enterprise-level admin tools, analytics, and online support resources.

For Students:

1. University and college students can learn for free on Coursera by signing up with a verified college or university email address and enrolling in courses by September 30, 2020.

2. Students can earn certificates for courses, projects, and Specializations they are enrolled in for free, by completing the course within two months from the date of enrollment.
