## CBCS-based syllabus for M.Sc. Chemistry (2 years) Programme

### General Informations:

- (1) It is two years Master Degree Programme
- (2) There shall be four semester to complete programme, i.e. 1<sup>st</sup>, 2<sup>nd</sup>, 3<sup>rd</sup> and 4<sup>th</sup> semester
- (3) Each semester shall consist of 15 weeks of academic work equivalent to 90 actual teaching days.
- (4) This programme will have three types of courses, i.e. Core course and Elective course.

**Core course-** The core courses are those courses whose knowledge is deemed essential for the students registered for a particular Master's degree programme.

**Elective course-** The elective course can be chosen from a pool of papers in II<sup>nd</sup> and IV<sup>th</sup> semester.

- (5) Each course will have 100 marks in full and divided into 70 marks for end-semester exam and 30 marks for internal assessment work except AEC, AECC-1, AECC-2 and practical papers. Internal assessment will be in two internal exams of 10 marks each, 5 marks for seminar/internal project and 5 marks for attendance/discipline.
- (6) In practical papers the distribution of marks in CIA will be same as prescribed for term end semester practical papers.
- (7) A student in fourth semester can choose a generic paper or CC-5 paper of any other subject of the faculty as DSE.

**Credits-** A unit by which the course work is measured. It determines the number of hours of instruction required per week. One credit is equivalent to one hour of teaching (lecture or tutorial) or two hours of practical work/ field work per week.
